STAR BIRD BELT DYNAMIC DESCRIBED:

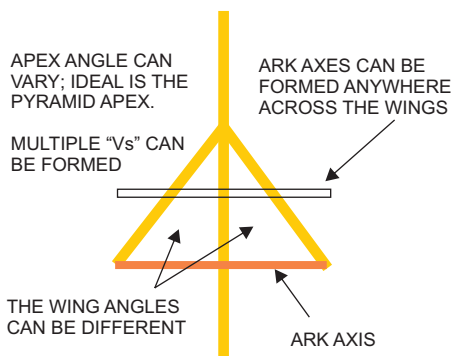

Thoth: The "Falcon of Andora" is the Bird that awakens - it tears open the containment field with it's talons and then reaches into the "ark" with it's beak to extract the beating heart, which it eats. While this may seem a violent symbology - it is all an act of LOVE. Once the Heart of the Sacred is taken from the vault / ark and consumed by the Great Bird of Light, it can never be the same again - it is TRANSFORMED into the vehicle or merkabah of PURE BEING. Yes, the Falcon and "hawk design" are the same dynamic. **When creating the Aeriopax, the Falcon is fully engaged in "consuming the heart."**

Main dynamic path / function of the LP40 "Opening of the Lotus." (NOT the galaxy "unfolding Lotus" - but the New Earth Lotus dynamic - which of course, leads to the latter.):

The Falcon of Andora is a HORUS dynamic - an aspect of the whole "HOR'RA" (Tree of Life sephirothic lightning path transformed into a whirling torus).

The configuration of the FALCON-FOOT given above is the "STAR BIRD BELT."
