

"JEWEL IN THE LOTUS": BYTHORN CROP FORMATION, 1993.

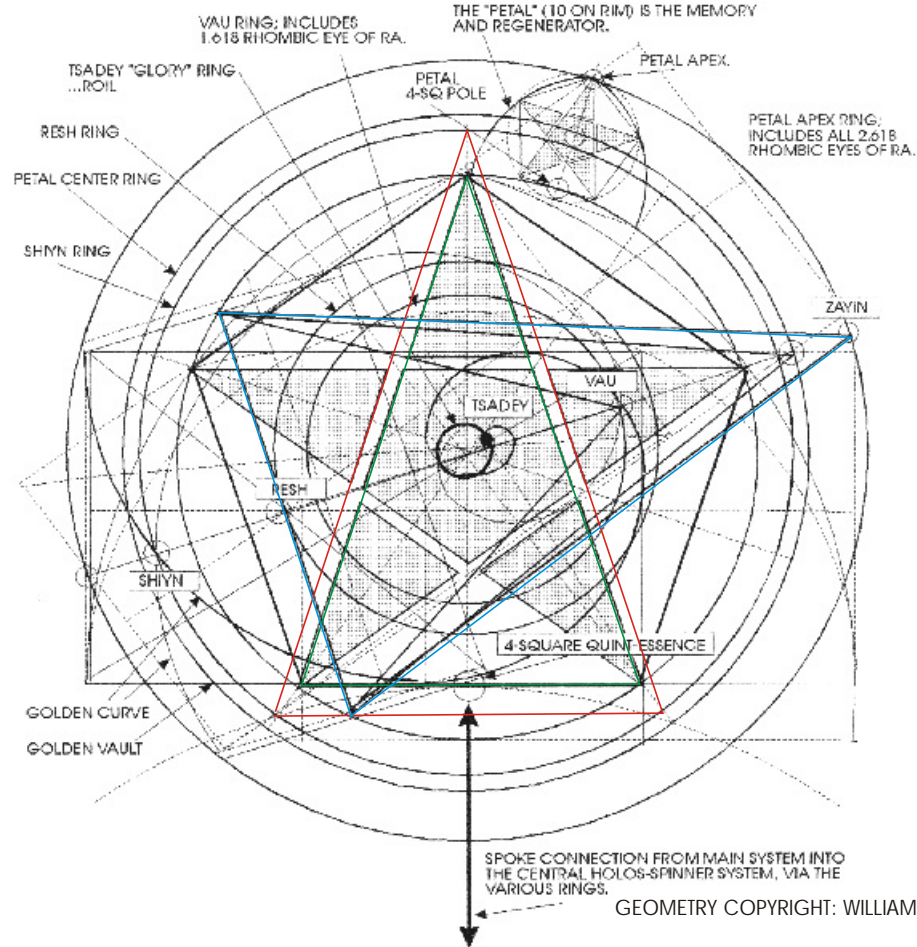

(FORMATION NAMED BY THOTH/MAIA NARTOOMID)

THIS FORMATION CONTAINS A VISIBLE PENTA-STAR AND AN INVISIBLE REVERSE STAR TO MAKE A 10-POINT WHEEL, EACH POINT HAVING ITS OWN PETAL A "HOLOS" SEED FUNCTION.

THERE ARE 3 RINGS (SPHERES) AROUND A CENTRAL SPHERE. I AM USING THIS COMBINATION TO MODEL A CENTRAL ULTA POINT WITH 3 "CREATION RINGS." THERE ARE SEVERAL SIZES OF PENTA-STAR APPLICATIONS IN THIS, EACH USES A RESHEL SYSTEM. THE 10 PETALS FURTHER REFINE THE MULTILEVEL HOLOS.

"JEWEL IN THE LOTUS" CROP CIRCLE: THE BYTHORN FORMATION, 1993.

THIS SKETCH ILLUSTRATES THE RESHEL "SPEAR" FORMED AT ONE OF FIVE POINTS OF THE "JEWEL OF THE LOTUS" SPINNER. THERE ARE FIVE RESHEL SYSTEMS IN ONE STAR. THERE ARE TWO STARS. THE ONE SHOWN SPINS CW, THE ONE NOT SHOWN SPINS CCW ON THE "OTHER SIDE" OF THE SPINNER TELEPLANE. THE BASE HOLOS STAR KEYS IN TO THE PETAL VIA THE 4-SQUARE QUINTESSENCE POINT AND THE PETAL APEX VIA THE ZAYIN RING.
