

"DENDERA CEILING"...HATHOR TEMPLE AT DENDERA, EGYPT
(VALID METATRONIC REFERENCE)

THIS GRID IS THE TEMPLATE USED IN THE ARK'S "HONEYCOMB" CORE TO INTERFACE AND TRANSLATE THE TOTAL CELESTIAL STELLAR "HELIO-MAR." THE OTHER PLANE USES THE "EMERALD-MAR" FOR THE COMPLEMENTARY PLANETARY TEMPLATE. THESE FORM A TELEPLANE.

SHOWN HERE IS THE CRITICAL 3 AXES USED AS A PARHELION DYNAMIC. THIS IS CALLED: "TERA CORPUS": THE "BODY OF FERMAMENT (HEAVEN-BODY)." A "STAR SEED" PATH USED BY THE PRIESTS TO COMMUNICATE WITH CELESTIAL BEINGS. (THR/MAIA)

THE PARHELION ALSO ACTS AS A "STAR-BIRD HORIZON PORTAL" GRID. THE PURPLE AND BLUE LINES FROM RIGEL AND ACULUS/PYTHUM REPRESENT ARKS.

SIRIUS RA: 6 45 08.9 (Hours, minutes, seconds)
RIGEL RA: - 5 14 32.3

1 30 36.6 DIFFERENCE = 15+7.5 or about 22.5 degrees between RIGEL and SIRIUS.

ANGLE BETWEEN RIGEL AND THE TEMPLE AXIS = 26.3 degrees.
Therefore Sirius is 3.8 degrees East of the Temple Axis. **The meridian is the center of the Gemini Twins.**

22 degrees IS THE TYPICAL PARHELION ANGLE BUT IT EXTENDS TO 50degrees.
Therefore IT IS ASSUMED THAT RIGEL AND ACULUS/PYTHUM ARE PARHELIA "DRAGONS' EYES" AT 22.5 AND 20.8 (21) RESPECTIVELY. (MINIMUM PARHELIA REFRACTION IS 21.7) **WE DO NOT KNOW THE EXACT POSITION OF THE UNFALLEN TWIN STAR .)**
