

PTAH HOLD (ALIKAR) GRID ZAYIN POLE MATRIX

TWO SPHERES ARE PROGRAMABLE BUT THE BASIC PROGRAM USES THE "DIADEM" COMPOSITE (CHIRTON BOTTOM AND ITALIAN FORMATIONS). 12 MATTER AND ANTI-MATTER SPIRALS UNIFY THE 2 (OR MORE) SPHERES IN A CENTRAL CREATION MEMBRANE SYSTEM.

A 28-pole system pairs the dipoles of our universe with it's "anti-matter" universe. In other words, the 28-pole system communicates with the dipoles of the anti-matter system and harmonizes the dipoles of its matter universe to those in the anti--matter universe.

In the PTAH HOLD's central chamber is collectively the 'Ra Eye' (a Thoth name, although the ancient name, U'Aton Omkharis, means essentially the same thing). The Ra Eye contains several working parts:

- 1) The 'hub' anchored into the ceiling. Made of an 'otherworld' metal, this tubular ring contains 28 'ball-bearings' the size of large oranges, such that when the device is activated, they spin and move against each other inside their tube. In the center point of the circle the ring prescribes, a powerful itonic field is generated.

NOTE: Itons: Particles of supra-atomic substance which can bond to the Oritronic Spiral. These particles act as 'seeds' for the Metatronic consciousness in this reality system.

- 2) The 'dish' set into the floor of the PTAH HOLD. This is made of glass which is formed from gold which has been alchemically altered into its purest physical state. In the center of the dish is a cylinder of titanium and gold, which extends upwards from the center point. This core cylinder has been charged with a negative-ionic field, whereas the ionic field being created in the hub is in a positive charge modality.

When the Ra Eye is activated (contained both the ring and dish dynamics), a column of supra-particles called: 'zoi' are created between the two ports - the ring and the dish. The zoi particles create a containment field for the entry of the Layooesh Pillar of Light. The Layooesh is brought into the zoi field by the combined energy dynamic of the Enochian Master forms in suspension within the vaults encircling the PTAH HOLD. The Zartakii crystal, which is the activator/controller of this whole dynamic, is positioned in its physical form (as it's greater energy body is etheric) on a granite stone altar beneath the Ra Eye. To activate the Layooesh within the Ra Eye, the crystal is never physically touched. Two or more persons position themselves around the Ra Eye and call upon the crystal to activate. As they do this, so it forms holographically, suspended in the center of the zoi field, drawing upon the 'EM' of the Enochian Master forms and bringing through the Layooesh as a pillar or column of light between the two ports of the Ra Eye.
