

(THIS RESHEL PROJECTS ON THE OTHER SIDE ALSO.)

THIS VERSION HAS ITS RESHEL ZAYIN POLE IN KINGS LYNN, ORIENTED ON THE RHUN HABAR AXIS. SPECIAL "MOON DISC SPINNER" IDENTIFIES AS THE FIRST RESHEL DISCOVERED ON THE CHAPEL ST LEONARDS LINE.

GREEN SPOTS ARE POINTS OF COINCIDENCE.

THEORY IS THAT THE CHAPEL ST LEONARDS RESHEL IS THE MAIN "RIDER" FOR THE KINGS' LYNN HELIOTROPE THAT "SETS" ON THE RHUN HABAR AXIS. THE BLUE 8-POINT RING MAY BE A "HORIZON OF THOTH" ESTABLISHING A MAJOR REALITY FORM IN ITS CENTER, USING THE "RIDER" SOLAR/LUNAR CODES TO PROJECT INTO KINGS' LYNN CONTROL.

CENTER OF SPIN IN KINGS' LYNN
